

CUCIRUMAH MAID SOFTWARE

Cleaning Services Portal

Two focused features for daily cleaning-service operations: maid salary calculation and schedule-list management.

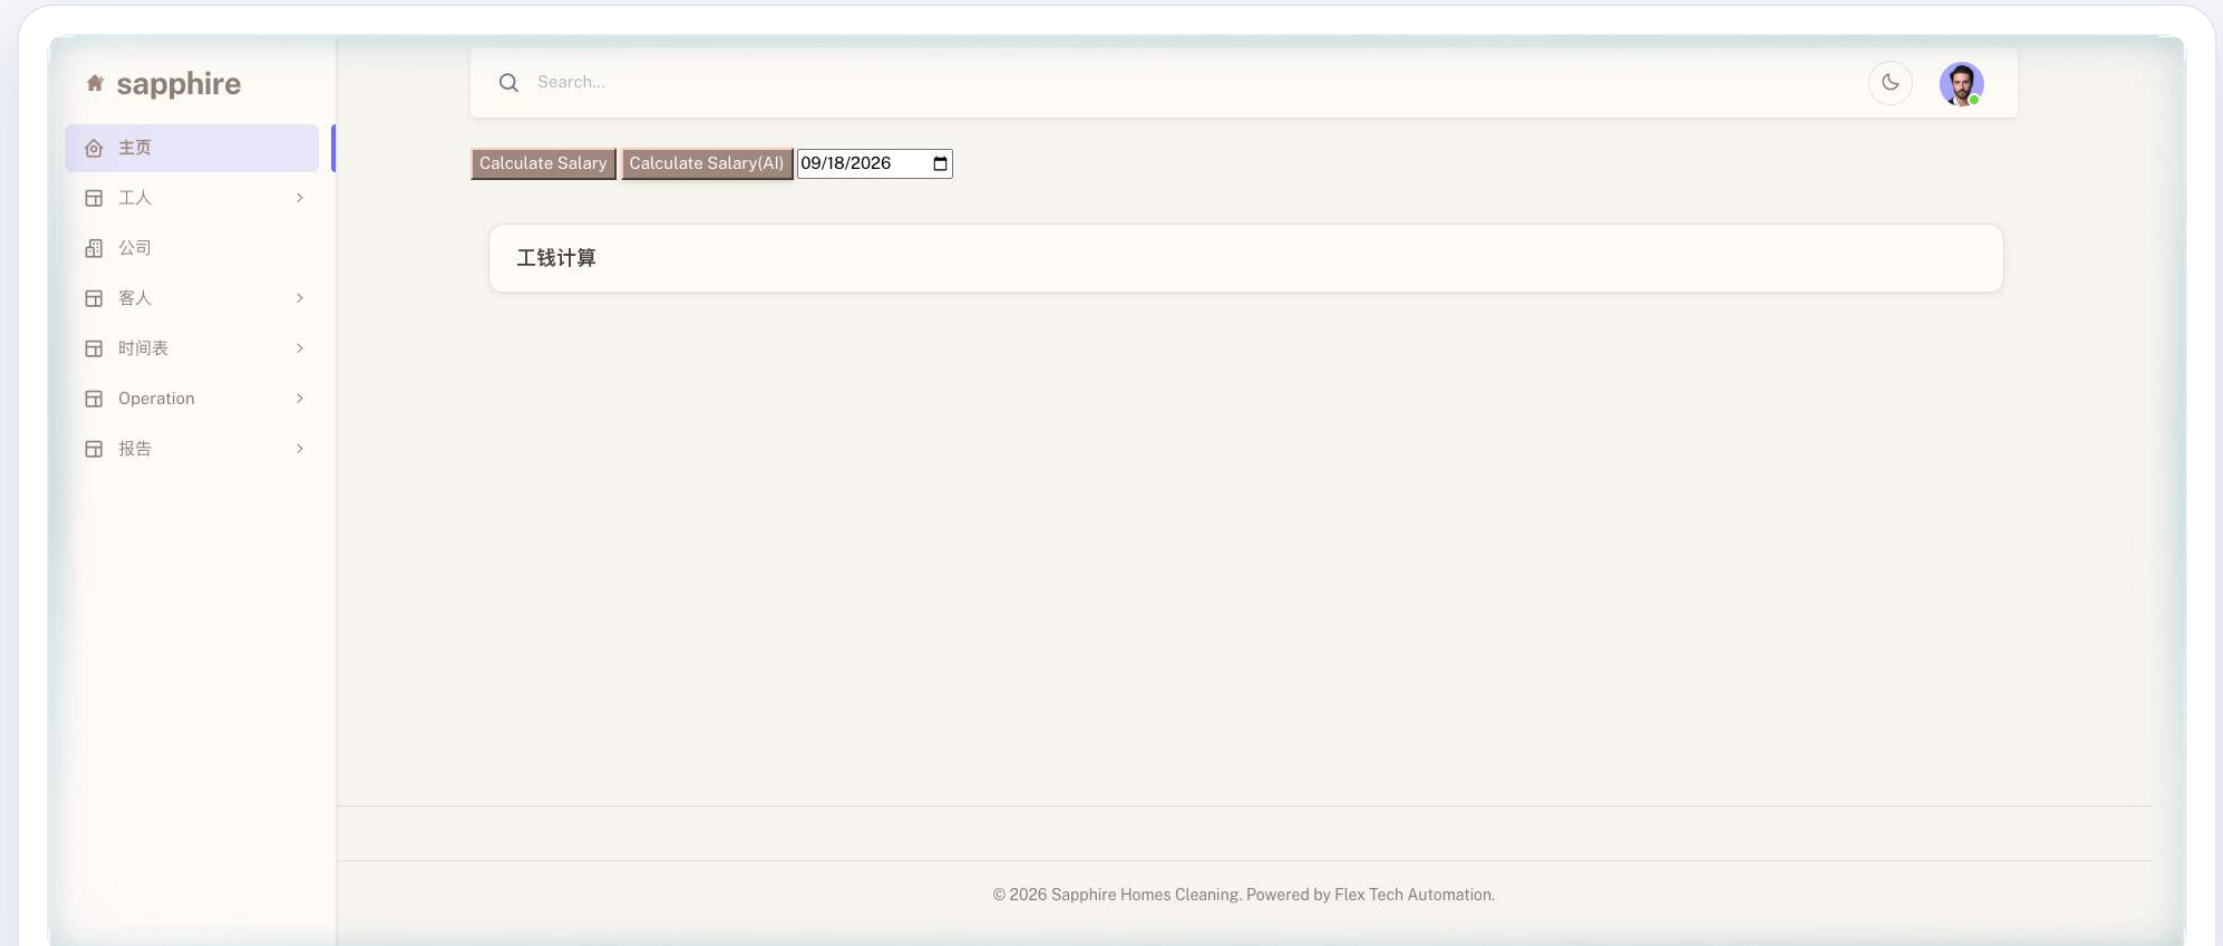

Maid salary

Cleaning schedule list

CuciRumah

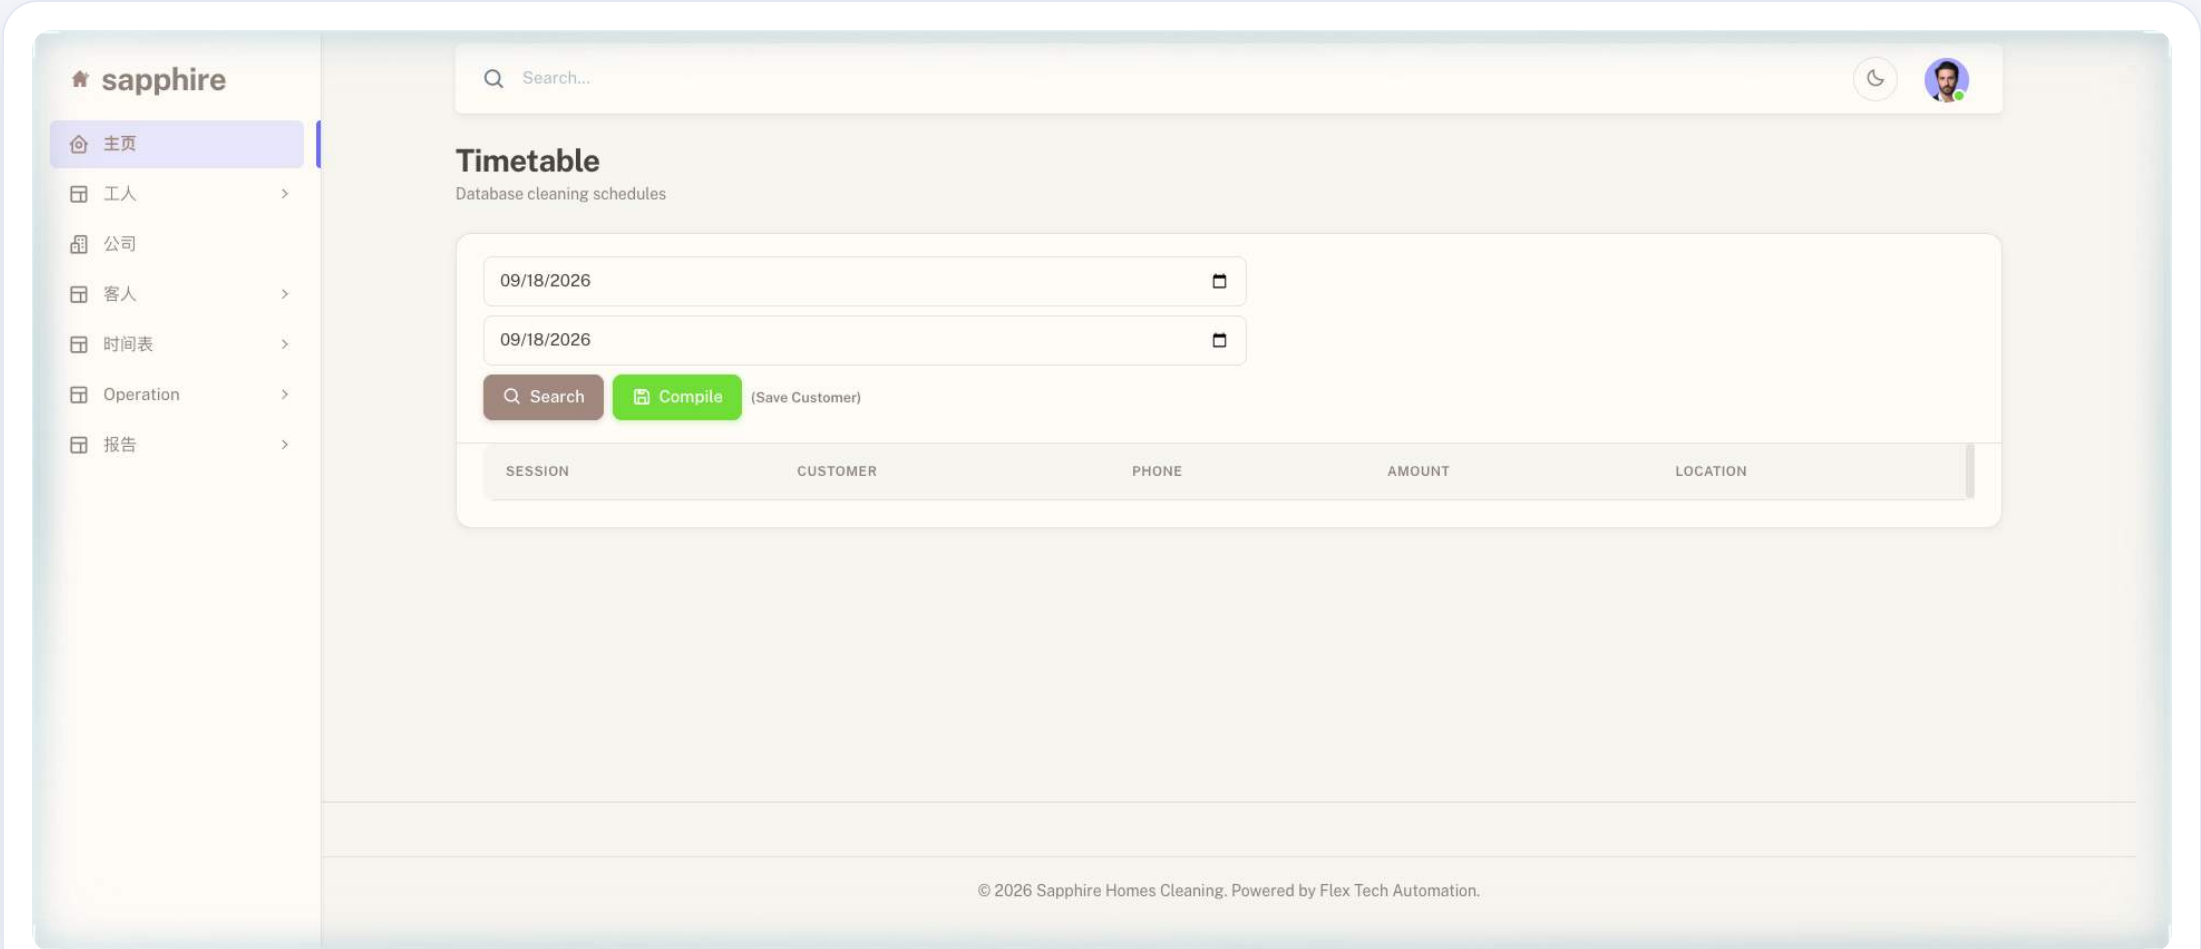

Calculate maid salary from recorded work

The salary screen gives the office a single place to select a calculation date, run the salary calculation, and review maid payroll records.

Find and compile cleaning schedules

The schedule list lets the team select a date range, search the database, and compile the customer sessions that need to be scheduled and assigned.

Two features, one daily workflow

1. Build the schedule list

Search the date range, review sessions, customers, locations and amounts, then compile the work list for the day.

2. Calculate maid salary

Use the recorded work and selected date to calculate maid salary with a repeatable process for the office.

For cleaning-service owners

Reduce manual checking across chats, spreadsheets and paper notes. Keep the daily operational record in one portal.

For office teams

Move from schedule lookup to payroll calculation with a clear, focused workflow that is easy to repeat.
